 420 m²

QUALITY DEVELOPMENT

Canberra Investment Corporation Limited (CIC) has come a long way from its modest beginnings in the early 1990s, now representing one of the ACT region's most successful and progressive property development companies.

Occupying premises in an older part of Canberra, it was time to relocate to a space that more closely reflected the company's standing in the community, as well as accommodate growing staff numbers and exciting future endeavours.

The brief was to create an environment of elegance and quality, housing all staff comfortably with a range of facilities for equal access, as well as providing an inviting environment for visiting clients and consultants.

The newly designed fitout supports the company's people with a functional layout that exudes quality and provides a pleasant environment for CIC's professionals.

The distinct features of the new space include high end joinery by Schiavello ACT. The use of American Cherry veneers, high quality desk units and finishes are used consistently throughout the fitout. The reception area through to the boardroom and adjacent meeting rooms are exceptional working spaces and are used constantly by all of the executive staff.

"The Schiavello team were excellent to work with and we were most impressed with the care and diligence of the construction team who worked tirelessly to ensure that deadlines were met and the quality of the development was achieved," says Ron Bell of Canberra Investment Corporation.
