Guidelines for the care and
maintenance of goods supplied

2009

SOLID SURFACE

Corian®, Marblo®, Hi-Macs®, Staron® etc
Solid Surfaces are more durable and resilient than natural stone, however there are some basic cleaning principles that must be adhered to

Allowed

- (a) Spills should be cleaned promptly. Clean with a mild detergent, spray and wipe type cleaner or soapy water with a soft cloth or sponge
- (b) For stubborn marks use a very mild abrasive cleaner such as diluted Jif with a soft cloth in light circular motions
- (c) Finish by wiping surface with a damp cloth or sponge removing detergents, and dry with a soft clean cloth
- (d) For extreme staining and scuffs, a light buff, in circular motion with '3m scotch-brite', followed by the above steps will generally restore the finish

Disallowed

- (a) Do not use sharp products such as steel wool or abrasive, acidic solvents
- (b) Although generally resistant to permanent staining, do not expose to strong chemicals such as acid based and organic solvents
- (c) To maintain a uniform appearance, clean evenly and never apply excessive pressure or clean/rub the same area for a prolonged time
